

**LIMARTEC® WOOD VENEER** is the newest development in decorative interior surfaces with preventive structural fire protection. This flame retardant real wood veneer is patent-pending and is available in various types of wood. It is MED certified (wheelmark), halogen free and complies with REACH requirements. The brilliant tones of natural wood are eye-catching. LIMARTEC® WOOD VENEER has been designed for use in the building construction sector which has to adhere to stringent fire protection regulations (public buildings, high-rise buildings, tower blocks etc.) and ship and yacht interiors, in accordance with SOLAS and PYC standards.

# LIMARTEC® WOOD VENEER
